(54) FACILITY MAINTENANCE TECHNOLOGY MANAGING SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To easily retrieve and generate required technology literature at the time of maintaining and managing a facility.

SOLUTION: Technology information such as facility technology data, a machine fault report, and facility management data is stored in a technology information storage means so that they can be retrieved. Drawing information is stored in a drawing information storage means so that it can be retrieved. An information managing means associatively manages facility maintenance technology information stored in the technology information storage means and drawing information stored in the drawing information storage means. An information retrieval means retrieves facility maintenance technology information and drawing information, which are applied to retrieval object information, by referring to the information managing means based on inputted retrieval object information. The retrieval result is outputted by a retrieval result information output means.

LEGAL STATUS

[Date of request for examination] 28.05.2003

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's
decision of rejection]

[Date of extinction of right]
